

FARM AND BARN

WWW.RAMMFENCE.COM | 1.800.853.1611

DEBBIE'S LETTER TO YOU!

Welcome to all of our customers and friends! You have made RAMM Horse Fencing and Stalls the **NUMBER 1 CHOICE** for fencing, stalls and equipment! I personally want to thank you for telling other horse, cattle and exotic animal owners about us! We cannot tell you how wonderful it is to be a part of your projects and your lives!

For over 24 years we have been providing barn and farm products for your horses and animal needs. We consider it a joy to share our common passion with you daily! At the RAMM farm we have been using our products since we started in 1988. We know that durability and long lasting products are important when it comes to taking care of your horses and animals. But don't let me tell you, our customers agree and you will see their good comments throughout this guide!

OUR NEWEST product line is sure to help you with any of your fencing issues! **The HIGH IMPACT** Flex Fence Series is sure to give you more than you expect! When our customers ask us to provide them with a quality, long lasting and easy to install flex fence, we listened to their requests! After 10 years of testing **RAMM's HIGH IMPACT**, we can now offer you unsurpassed performance, and a **LIFE TIME** limited mfg. warranty! So easy to put up that a 55 year old grandmother shows you how on our installation video and/or manual! This should be a big encouragement to anyone

that would like to install fencing for themselves! **HIGH IMPACT** is proudly **made in the USA**. Additionally we carry a large line of electric, tape, braid, woven wire, and PVC for your farm. You'll find all of your fencing accessories, hardware and posts here. We have a fence for your horses, cattle or exotics that meets every need and budget!

Would you like a **free estimate or advice on your project**? Call our toll free number at **1-800-416-1958**. A member of our staff will offer all of the help that you will need to complete your project. You can fax (419) 825-2433 or email us at ramm@rammfence.com. We look forward to helping you!

If you are in the market for new stalls or looking to update existing stalls, RAMM is the one stop shop for you! Our stall manufacturing plant, located right in Archbold, Oh, fabricates **Welded Stalls at budget-friendly prices or one-of-a-kind Custom Stalls**. We carry multiple options for doors, window grills and hardware to complete your barn! No stall is complete without feeders, stall mats and water systems. Our stalls and accessories will help to keep your horses comfortable and healthy with the extra benefit of a beautiful look to complement your barn!

Have you visited our web sight lately? Just go to www.rammfence.com and you will not only find helpful information on our fencing, stalls and equipment, but also informative articles to help you with your farm and horses. If you have a product or horse question and would like to

talk, click onto "**Resource Center**" and "**Ask Debbie**". I will personally email you with ideas and answers for your particular project!

By the way, be sure to look for us on **Face book, Twitter and G+**. There is a whole world of interesting conversation going on with horse owners and RAMM! Sign up for our free e-newsletter or subscribe to our '**ASK DEBBIE**' Blog. We will keep you in the loop on what other horse owners think about and do, what's 'hot' and what's 'not'! In addition, we will send you informative articles that will help you with your horses as well as your farm and barn! For more details go to www.rammfence.com.

From myself, as well as our family and staff, we **thank** all of our customers who have touched our lives so deeply. We are privileged to talk with you just like a neighbor down the road. We are all thankful for all of your encouragement and great comments. You remind us daily that we are especially fortunate to be able to share a common passion: our horses and animals!

Ride long, laugh often...

Debbie Disbrow
Founder and President of RAMM Horse Fencing and Stalls

Website: www.rammfence.com

HOURS OF OPERATION

Monday - Friday
8:00 am - 6:00 pm
Saturday
9:00 am - 12:00 noon
(Eastern Standard Time)

PAYMENT OPTIONS

All orders are to be paid in full prior to shipment. We accept Master Card, VISA, Discover, Money Wire Transfers and personal checks. Checks should be made payable to: RAMM Horse Fencing & Stalls.

RETURN POLICY

20% restock fee - IN STORE CREDIT ONLY. ALL returns must be made within 15 days.

HOW WE SHIP

Most orders under 70 lbs. are shipped UPS. Orders over 70 lbs. or oversized products are shipped common carrier freight. Customer is responsible for off-loading and signing for goods on arrival. Carefully check your order upon receipt, as damage sometimes occurs during shipping. All items are checked prior to shipment, and any damaged or missing packages must be noted with UPS or freight carrier at the time of delivery. Any shortages or inaccurate shipments must be reported to RAMM Horse Fencing & Stalls within 24 hours.

SHIPPING TIMES

1-99 rolls of fence-24 hours, 100 rolls and

higher-72 hours (in most cases). Please allow 4-6 weeks for custom stall orders.

UPS & FREIGHT DELIVERY

UPS & Freight rates are calculated by weight and/or weight per package. We can calculate shipping costs as soon as your total order is completed. UPS can leave packages at doorsteps without a signature, however, freight customers MUST be present to accept the order and off load it.

FLATBED

Some orders may need to ship via flatbed carrier instead of a common freight carrier. In this case, we will provide you with a flatbed delivery sheet that must be completed prior to delivery.

WARRANTY

The duration of our warranties are displayed on the page that the product appears. Most warranties are a limited manufacturer's warranty for the duration stated. Installation must comply with manufacturer's specifications for warranty claims to be valid. Instructions will accompany each product, and our representatives will be on hand to answer any questions regarding installation. Please contact RAMM Horse Fencing & Stalls for all warranty claims.

DISCLAIMER

RAMM Horse Fencing & Stalls, Inc. strives to ensure that all information in this catalog is correct and accurate, however the information in the catalog has been gathered from many sources. As a result, RAMM Horse Fencing & Stalls cannot be held responsible for misprints in pricing or typographical errors. Photographs in this catalog are from new and previous product lines. RAMM Horse Fencing & Stalls also disclaims responsibility for use or misuse of any products described in this sales guide, and any losses incurred through the use of any products according to the methods described herein. All products should be used according to the manufacturer's instructions. We have a constant product improvement plan in place and reserve the right to make changes and upgrades without notice. Prices subject to change without notice. This catalog supersedes all previous publications by RAMM Horse Fencing & Stalls.

FENCE ESTIMATE CENTER

FAX OR EMAIL YOUR LAYOUT FOR A **FREE** ESTIMATE!

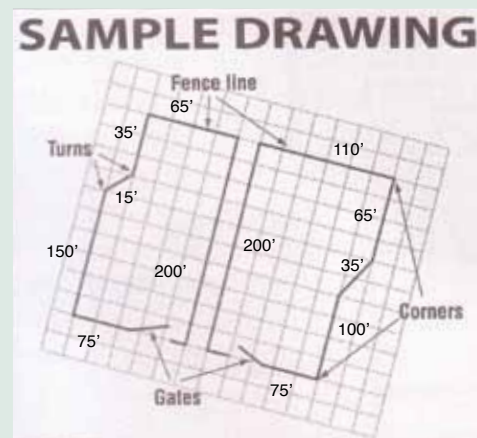

In order to provide you with an accurate estimate, please sketch your layout (onto plain paper if you are faxing to us 419-825-2433) and answer the following questions. Include all of this information with the layout. If you need help, or are unsure of the best way to lay out your property, give us a call and we can help!

1. What type of fencing material are you interested in? How many rails (horizontal strands between the posts) do you need?
2. What do you need to accomplish with your fence? Keeping

horses away from a highway, cross fencing, riding arena, etc.?

3. Where will your gates be located and how many do you need? Placing them at corners can often cut down on cost.
4. What post spacing will be used? When fencing in horses, a maximum of 12' post spacing is best for most fencing. For high-traffic areas or smaller paddocks, 8' post spacing is better. What type of posts will you be using?
5. What are your soil conditions like? Rocks, sand, clay, hills, etc.?

6. Are there any special considerations or concerns, such as shared fence lines, trees, etc.? Tell us all you can and please be detailed so that we can help you get the best fencing for your farm.

PLANNING YOUR FENCE

RAMM Horse Fencing - on the right road to quality!

SOME IMPORTANT QUESTIONS TO ASK WHEN PLANNING YOUR FENCE:

1. How large is your pasture? If you don't know, measure the distance between your existing posts and add the total footage. Or, measure the distance of one of your steps and walk off the area. If the area is open, drive stakes in the ground and string off the pasture.

2. How many horses will be in this area? Do you have Geldings, Mares, Foals, or Stallions?

3. Do you need to separate your horses? Do you need to do rotational grazing? Catch areas, pony or small animal containment as well as large horse pastures?

4. How many gates will you need? Include any that you are thinking about now, rather than adding them after installation is complete. Consider having a 16' "utility gate" at one end of your pasture for the use of large vehicles or equipment. Most turn-out gates should be 8, 10, or 12' in length. Our staff can give you suggestions for the size and placement.

5. What is the content of your soil? Do you have hills? Standing water? Sand or rock?

6. If you are considering electric do you have overhead electric lines or water lines close to where your fence will run?

7. Which areas will have the highest amount of congregating horses? This is considered a high traffic area. Do your horses test, chew, lean or otherwise

abuse fence? This is important to consider and discuss. We can give you ideas to help protect your fence and your investment of hard earned dollars!

8. What will you want to fence in the future? Our staff can help you save money if you plan ahead for future additions to your pastures.
9. Determine your budget; by doing this we can help you choose the right fence for your situation and budget. Remember: The difference between a good fence and a bad fence is usually one vet bill. Ask how we can help you with easy long-term maintenance. Our goal is to help you fence your horses safer and keep your fence looking new longer!
10. Most horses are in their pasture 50-100% of the time. A mature horse weighs between 1,200 to 1,800 pounds, and will contact your fence at some point. Make your pasture as safe as you can, choose a fence that is made for horses!
11. Can't do all you want at once? RAMM Horse Fencing & Stalls can help you determine your long-term farm and barn needs for your horses. You can break it down into phases and do your project in the time frame that works for you! It's better to know your goal, rather than "adding on". When you "add on" without a plan, your facility can become unorganized and lengthen the time it takes to do your every day chores.

NEW! HIGH IMPACT - INNOVATIVE FENCING

3 or 4 rail for your horse's particular needs

Grandmother installed this fence, herself!

"MOST REQUESTED FENCE" by our customers!

The innovative benefits of NEW High Impact provides THE EASIEST flex fence installation today. User-friendly installation video or manual provides step-by-step instructions so you get it right the first time! LIFETIME Limited Mfg. Warranty with our Plus Series is like no other flex fence on the market today! Over 10 years of research with in-house and farm testing! We selected the best polymer material coupled with the longest lasting - industry leading high tensile wire. We are the ONLY user of the double coated high tensile wire. "The ingredients in High Impact contain the maximum color and UV inhibitors that the polymer can absorb." Mildew resistant formula makes High Impact the future standard for horse farms, from Florida to Alaska!

Made proudly in the USA.

"Our installation video is of an actual farm fence that is installed by a woman in her 50's! We wanted to show how women can also install this fence, which should give many horse owners encouragement when it comes to putting up fence." Debbie Disbrow courtesy of *Equine Journal*, 'Innovations That Make Life Easier on the Farm' by Susan Winslow - Spring 2012

New High Impact easily flows around corners and follows the lay of your land.

LIFE AFTER BOARDING

BRINGING YOUR HORSE HOME

If you have always boarded your horses, the opportunity to bring them home is one of life's greatest pleasures. It is truly wonderful to be able to walk out of your home and visit with your equine friends any time you want.

Preparation of living quarters and pasture should be your first priority. Stable accommodations can be a simple outdoor shed or a complete barn, and pasture considerations are equally important. Deciding when, where, and for how long your horse is pastured is totally your choice. You'll also be the one to choose whether your horse will be pastured alone or with other horses.

As your horse's owner, you know his temperament best. If your horse is used to traveling, showing or trail riding, he may take the change completely in stride. But for many horses, a significant change in living arrangements can be pretty stressful. Your horse will need your love and reassurance

to make a smooth transition. Here are some tips that can make your horse's homecoming a little easier:

- Will you be feeding your horse the same feed he has become accustomed to in boarding? If not, purchase a limited quantity of his "board" fare so you can slowly introduce him to new feed. Mix hays and grains for a few days, gradually using less of the "board" feed and more of yours.
- Remember, not all water tastes the same to your horse. If the boarding facility's water source is different from home, the mineral content (iron, sulfur, etc.) may be substantially different and your horse may not drink. Bring some water home from the boarding facility and again, gradually mix the two until he has become accustomed to his "home" water.
- Is the trip home a lengthy one? Make travel as comfortable and easy as possible. Hay will help make for a more pleasant trailer ride. Make sure you plan for several watering stops along the way.
- You will be excited to get home with your horse, and so will he. Your horse will definitely pick up on your attitude, so focus on staying calm. This will help set the stage for an easier adjustment to a new environment.
- Whenever horses are introduced to a new pasture, it's a good idea to walk the fence line with them.

- Let him look, sniff and evaluate his new surroundings. If your horse is very excitable, you may want to start him out in his new stall with fresh water and hay. If possible, position him so that your horse has a "view" from his stall, so he can visually get used to his new surroundings.
- Always end on a positive note. Talk to your horse and praise good behavior. Keep him as calm as possible; turn out will be much easier. You may want to put hay out near the area where you will be retrieving him from turnout as a little extra "motivation."

Have a happy homecoming, and enjoy this next phase of horse ownership. Remember, there are many other preparations you need to make before bringing your horse home, and our staff is here to help you and your horse get off to a good start!

5" Item #5SPLICE(W,B,BR)-2
Price: \$ 14.88
4" Item #4SPLICE(W,B,BR)-2
Price: \$ 14.88

END TIGHTENER
Used to tension High Impact Fencing. Comes in white, black or brown.
5" Item #5ETEN(W,B,BR)-4
Price: \$ 27.88
4" Item #4ETEN(W,B,BR)-4
Price: \$ 27.88

5" & 3.5" RING SHANK NAILS
Fastens tensioners to post. Tremendous holding power.
Item #5N
Price: \$3.98/lb. (21 nails/lb.)
Item #35N
Price: \$4.98/lb. (37 nails/lb.)

WIRE LINKS
Non-release, used to join or splice two ends of High Impact fencing. Rounded edges, horse friendly.
12.5 Gauge Item #WL
Price: \$2.98
16 Gauge Item #WL-16
Price: \$ 2.98

2" BARBED STAPLES
Used to terminate High Impact Flex Fence.
Item #BS2
Price: \$3.49/lb. (44 staples/lb)
Extra wide barbed staple to use with HotCote insulator tubing.
Item #BS2W
Price: \$3.98/lb

RAIL FENCE TENSIONER
Use to apply tension to fence. Use with RTH handle.
Item #TENSIONER-1
Includes 1 - 5" nail
Price: \$3.48

IN-LINE FENCE TENSIONER
Save time with the new quick end. Allows 12.5-gauge wire to be attached to the tensioner without connectors. Use with RTN handle.
Item #RTI-1
Price: \$4.95

END FENCE TENSIONER
Use to apply tension to fence. Use with RTN handle.
Item #RTE-1
Price: \$3.95

LAG BOLT
1/2" x 5" Hot Dipped Lag Bolt w/washer. Used to attach end and t-buckles at terminations.
Item #5LAGW-1
Price: \$1.49

NEW TENSIONER HANDLE
Use to apply tension to fence. Use with RTI or RTE tensioners.
Item #RTN-1
Price: \$4.95

TENSIONER HANDLE
Use with item code tensioner to tighten fence lines.
Item #RTH-2
Price: \$9.98

RATCHET HANDLES
Used with spoolers to tension fence rail. Handles 15" long.
Item #RH-4
Price: \$24.95

WIRE CUTTERS
Cuts high tensile wire.
Item #WC-2
Price: \$19.98

BARBED STAPLE DRIVER
Holds staples when driving them into posts.
Item #BSD-2
Price: \$12.98

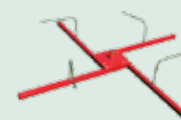

BRACE PINS
Used for horizontal bracing systems.
5" Item #5BP-.05
Price: \$0.99
10" Item #10BP-.10
Price: \$1.29

CRIMP SLEEVES
12.5-gauge sleeves for all fences except 1" flex-fence. Requires Crimping Tool.
12.5-gauge - Item #CS125
Price: 30¢ ea., \$14.98/bag of 100

DIAGONAL BRACE PLATES
Supports diagonal post bracing at ends and corners. Includes 8 - 3.5" ring shank nails.
Extra heavy-duty.
Item #BRACEPLATE-1
Price: \$3.89

SPINNING JENNY
Put the stake in the ground and your wire on top. Walk the wire out the distance of your fence. For coated wire & 1" Flex-Fence. Comes with arm extensions.
Item #SJ-23
Price: \$59.00

CRIMP TOOL
Use when splicing rails together with crimp sleeves.
Item #CT-8
Price: \$65.00
Also available to rent. \$65 deposit required.

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

HIGH IMPACT FLEX FENCE Q & A

**RAMM PRESIDENT,
DEBBIE DISBROW**
answers some of your
Flex Fence questions.

Q: What makes HIGH IMPACT Flex-Fence the best choice for my horses?

A: HIGH IMPACT Flex-Fence offers the key elements of strength and flexibility. Strength: this fence is one of the strongest available! When faced with an impact, it won't splinter like wood or PVC. Flexibility: this fence flexes on impact, and then returns to its original shape. Instead of staying rigid and possibly injuring your horse, this fence will give, while still keeping your horses confined. Flex-Fence combines the best of both worlds: stronger containment to help keep horses in their pastures, and the added safety of flexing on impact. The beautiful look is an added bonus!

Q: How is HIGH IMPACT Flex-Fence different from other flexible fences?

A: HIGH IMPACT PLUS Flex-Fence can only be found at RAMM, and our unique materials and manufacturing process makes this fence different right from the start! We use:

- 4,200 lbs. minimum break strength per rail
- Double coated high tensile wire is mechanically trapped in our polyolefin plastic which is only offered by RAMM!
- Looks better than a board fence with splintering or breaking problems
- Rail never needs to be painted
- Comes in either white, black or brown
- Lifetime Limited Mfg. Warranty
- **Made with pride in the USA**

Other flex rail products may look similar, but nothing can compare to the strength and durability of RAMM's HIGH IMPACT Flex-Fence!

Q: What are rails and how many do I need?

A: A rail is the horizontal piece of fence that attaches between posts. Most equine fencing consists of 3 or 4 rails. A 4-rail fence provides a better visual barrier, closer rail spacing and is more aesthetically pleasing. However, a 3-rail system will work for your horses if you plan on a shorter fence (approximately 4 feet). That way, spacing will be closer (rails should be no more than 9"-11" apart for horses). If you're on a budget and 3 or 4 rails aren't an option, ask our staff about combination fencing!

Q: Should rails go on the inside or outside of my posts?

A: Placing the rail on the inside of the post is recommended. Having the rail between the animal and post is stronger.

Q: What kind of posts do I need?

A: We recommend using pressure-treated pine posts. Round pine posts are strong, and also accept nails well. 6"x9' round, end and corner posts with 5"x8' line posts work with most rails and will provide a strong fence line. For smaller rails, 4"x8' line posts may be used.

RAMM Stalls & Horse Fencing

1" PONY RAIL FLEX-FENCE

Shown with 4.25", white, 2-wire top rail.

- 2 - 16 gauge pre-straightened galvanized wires
- 1,500 lbs. minimum break strength per rail
- Easier installation for you with the pre-straightened wires require less tension
- Versatile rail can be used alone, with existing fence system or as a combination fence system
- Great for horses, ponies and minis

WHITE, BLACK, BROWN	ITEM #	LIST PRICE	1-9 Rolls	10+ Rolls
660' Roll - 1" Flex Fence Roll only - Components sold separately	6601(W,B,BR)-70	\$178.00	\$159.75	CALL

5.25" HORSE RAIL® FLEX-FENCE

- 3-12.5 Gauge Pre-Straightened Galvanized Wires
- 4,860 lbs. minimum break strength per rail
- Save Time & Money with low maintenance fencing
- Easier Installation with revolutionary spooler system
- Designed specifically for horses!

RAMM Stalls & Horse Fencing

FENCING COMPONENTS

Proper hardware is imperative for your fence to be long lasting. From tightening your flex-fence to splicing your coated wire, we carry all the right components to do the job right the first time. RAMM has all the components that you will need to complete your fence project from tighteners, buckles, brackets, spoolers, and tensioners. We also carry a long line of fasteners and smaller items that are crucial in your fencing project, that you might overlook.

1" FLEX-FENCE STAPLES
Used with 1" Flex-Fence.
Item #PRS
Price: \$6.88/lb. (34 staples/lb.)

COATED WIRE TIGHTENER
Used to splice and tension coated wire.
Item #CWT-1
Price: \$7.95

COATED WIRE SLEEVE
Used to wrap coated wire around wood end posts.
Item #CWS- 0.5
Price: \$1.75

RAIL FENCE TENSIONER
Use to apply tension to fence.
Use with RTH handle.
Item #TENSIONER-1
Includes 1 - 5" nail
Price: \$3.48

IN-LINE FENCE TENSIONER
Save time with the new quick end. Allows 12.5-gauge wire to be attached to the tensioner without connectors. Use with RTN handle.
Item #RTI-1
Price: \$4.95

END FENCE TENSIONER
Use to apply tension to fence.
Use with RTN handle.
Item #RTE-1
Price: \$3.95

BRACKETS
5.25" Bracket
Item #5NB(W, B, BR)-1
Price: \$1.68
4.25" Bracket
Item #4NB(W, B, BR)-1
Price: \$1.28

END BUCKLE
5.25" End Buckle
Item #5EB(W, B, BR)-2
Price: \$9.98
4.25" End Buckle
Item #4EB(W, B, BR)-2
Price: \$8.98

SPLICE BUCKLE
Use to splice sections of flex-fence together.
5.25" Buckle
Item #5SB(W, B, BR)-2
Price: \$7.98
4.25" Buckle
Item #4SB(W, B, BR)-2
Price: \$6.98

T BUCKLE
5.25" T Buckle
Item #5TB (W, B, BR)-2
Price: \$10.75
4.25" T Buckle
Item #4TB (W, B, BR)-2
Price: \$8.98

FLEX FENCE SPOOLERS
5.25" Spooler
Item #5SPOOL(W,B,BR)2-2
Price: \$14.98
4.25" Spooler
Item #4SPOOL(W,B,BR)2-2
Price: \$12.98

45 DEGREE END BUCKLE
5.25" 45° End Buckle
Item #5EB(W, B, BR)45-2
Price: \$9.98
4.25" 45° End Buckle
Item #4EB(W, B, BR)45-2
Price: \$8.98

2" BARBED STAPLES
Used to terminate High Impact Flex Fence.
Item #BS2
Price: \$3.49/lb. (44 staples/lb.)
Extra wide barbed staple to use with HotCote insulator tubing.
Item #BS2W
Price: \$3.98/lb

BRACE PINS
Used for horizontal bracing systems.
5" Item #5BP-0.05
Price: \$0.99
10" Item #10BP-0.10
Price: \$1.29

5" & 3.5" RING SHANK NAILS
Fastens tensioners to post. Tremendous holding power.
Item #5N
Price: \$3.98/lb. (21 nails/lb.)
Item #35N
Price: \$4.98/lb. (37 nails/lb.)

LAG BOLT
1/2" x 5" Hot Dipped Lag Bolt w/washer. Used to attach end and t-buckles at terminations.
Item #5LAGW-1
Price: \$1.49

CRIMP SLEEVES
12.5-gauge sleeves for all fences except 1" flex-fence. 16 gauge sleeves are for 1" flex-fence. Requires Crimping Tool.
12.5-gauge - Item #CS125
Price: 30¢ ea., \$14.98/bag of 100
16-gauge - Item #CS16
Price: 30¢

ROUND CORNER BRACKET
Use this heavy duty, uniquely designed bracket for a 90° turn. Corner post can safely stay outside, away from horses and riders. Lag Bolts are not included with bracket.
Item #5RC(W, B, BR)-2
Price: \$5.45
Item #4RC(W, B, BR)-2
Price: \$4.95

WIRE VISE
Used to terminate lengths of 100' or less. Tensioning tool required, see page 19 for tool information.
5.25", 4.25" & coated wire - 12.5-gauge Wire Vise
Item #WV125-0.25
Price: \$2.98
1" Flex - 16 Gauge Wire Vise
Item #WV16-0.25
Price: \$2.98

WIRE LINKS
Used to join (splice) two ends of 1", Coated Wire, and Hot Cote. 12.5 Gauge Item #WL
Price: \$2.98
16 Gauge Item #WL-16
Price: \$ 2.98

DIAGONAL BRACE PLATES
Supports diagonal post bracing at ends and corners. Includes 8 - 3.5" ring shank nails.
Extra heavy-duty.
Item #BRACEPLATE-1
Price: \$3.89

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

FENCING TOOLS

The tools that you choose to use for your project will help to make the job **easier and faster**. RAMM carries a full line of tools for flex, electric, braid, tape, wire or PVC fencing. We suggest having a basic tool set so that when you do your periodic fence checks, you can make any necessary repairs immediately. Over time this is the best way to avoid any **unnecessary expenses from abuse or excessive wear**. You might even like to "ride" your way around your fence, as you check it! Get the benefit of time with your horse while you check out your fencing!

With coated wire fence, the spinning jenny is one of the most **useful tools you can use**. The roll of fence sits on the frame and unwinds as you walk your coated wire fence down the post line. Unwinding coated wire is necessary in order to not kink the wire - which can potentially weaken it. The spinning jenny is like an extra set of helping hands during your installation!

Ask our fencing experts what particular tools will help you with your project. We will be happy to explain their uses so you understand every step of your installation!

T-POST DRIVER
Weighted steel tube makes driving in a T-post easier & safer.
Item #TPD-25
Price: \$29.98

NEW TENSIONER HANDLE
Use to apply tension to fence.
Use with RTI or RTE tensioners.
Item #RTN-1
Price: \$4.95

TENSIONER HANDLE
Use with item code tensioner to tighten fence lines.
Item #RTH-2
Price: \$9.98

RATCHET HANDLES
Used with spoolers to tension fence rail. Handles 15" long.
Item #RH-4
Price: \$24.95

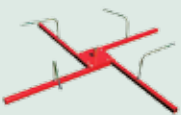

WIRE CUTTERS
Cuts high tensile wire.
Item #WC-2
Price: \$19.98

1" STAPLE DRIVER
Holds staples when driving 1" Flex-Fence staples into posts.
Item #SDJW-2
Price: \$18.98

10" FENCE PLIERS
Drives and pulls fence staples, also cuts wire.
Item #10FP-2
Price: \$14.98

SPINNING JENNY
Put the stake in the ground and your wire on top. Walk the wire out the distance of your fence. For coated wire & 1" Flex-Fence. Comes with arm extensions.
Item #SJ-23
Price: \$59.00

BENDING TOOL
Used to easily and accurately shape the end of the rail to be inserted into either a joining or end buckle assembly.
Item #BT5-2
Price: \$14.25
Item #BT4-2
Price: \$13.75

CRIMP TOOL
Use when splicing rails together with crimp sleeves.
Item #CT-8
Price: \$65.00
Also available to rent. \$65 deposit required.

WIRE VISE TENSION TOOL
Use with wire vises to tighten fence lines, see page 18 for information on wire vises.
Item #TT-6
Price: \$37.98

BARBED STAPLE DRIVER
Holds staples when driving them into posts.
Item #BSD-2
Price: \$12.98

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

COMBINATION FENCE

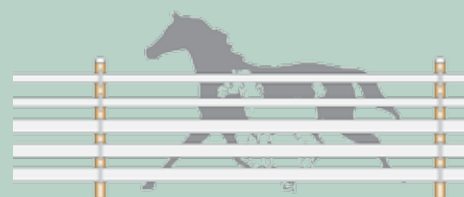

THE PROBLEM SOLVER FENCE SYSTEM

Do your horses need closer rail spacing? Do you need an extra barrier rail on the top and bottom of your fence? Or do you need an economical fence with strength and a clean look? Check out RAMM's combination fence! Any combination is right, if it fits your horses' needs.

Do you have an e-mail account? We can send you photos of our many customers' layouts to help you decide what will work for your horses. We can suggest ideas for stallion containment, "nursery paddocks," mini horses and so much more. Contact us today!

NURSERY PADDOCK

A nursery paddock grows with your horses. Contact us for more information!

4.25" Flex with 1 strand of Hotcote®

This fence is highly visible with the flex fence and discourages horses from leaning on the fence with the electric coated wire at chest level.

4.25" Flex with 8 strands of Coated Wire

4.25" Flex used as top site rail while 8 strands of coated wire are great for a wide variety of horses, from foals to stallions.

5" Flex with 3 rails of electric tape

5" Flex is used as the top site rail with 3 rails of brown electric tape to discourage horses from sticking their heads through to the other side.

4.25" Flex with 3 rail Hotcote®, and 1 strand 1/2" Electric Tape

4.25" as a top site rail, electric fence in the middle combined with Hotcote® (electric rail at horses chest or leg height).

5.25" Flex with Mesh Wire Fence

This visible fence combination includes No-climb for predator control and to keep the mares and foals safe in their paddock. Also great for perimeter fencing.

4.25" Flex with 4 strands Hotcote®

Installed in the smaller handling areas, 1 Rail 4.25" with 4 strands of Hotcote® is visible, effective, and economical.

RAMM Stalls & Horse Fencing

EXTREME FARM MAKEOVER

Thunder Ranch and Training Center - Kathleen T. from Graham, WA

It has been a long journey... Eight years ago this coming June we bought a 5 acre ranch with a wreck of a barn that our three horses, at the time, didn't even want to be left in because it was so icky and spooky. That first day we moved to our little ranch and I put my horse in one of the stalls and she had a fit, nearly kicking down the rickety stall walls, I knew right then and there what our first project was going to be. So began our journey...

We gutted the barn with its nailed shut big front barn door. **It took three months to get the barn prepped in our spare time after work and on weekends.** In the meantime I was shopping for some kind of hardware, plans or kits to create the stall walls. During my search I found **the RAMM Fence Company.** The stall kits were well within our budget and I was thrilled to find I could modify the partition walls as Veronica, a **RAMM Sales Representative,** suggested with a grill window on the partition walls so the horses

Standard Stalls Fronts with V-Doors

Part Horse, Part Beaver

Behemoth horses - tall, strong and don't care what is in their way

Before - Old, chewed on board fencing

After - 5 1/2" Brown 3-wire Flex Fencing

could see each other.

The stall kits arrived and our journey continued... We saved money using the 2" X 6" boards from the hayloft to build the first three stall walls on the west side of the barn and only had to buy a few treated boards for the base of each wall and door. The stall walls and doors were **easy to assemble and looked beautiful** when completed and just in time for winter.

In the **spring of 2005** our journey took a turn... It didn't take long for us to find out that our horses are part beaver. I think Indians never dugout canoes... they just tied a horse next to a log. I called **RAMM Fence again for assistance.**

After receiving samples of the Flex Fencing and Electric Braid we decided to go with the Flex. I went with the brown 5 1/4" fence. **My husband and I installed all the Flex**

Fencing on the east side of the barn over one weekend (once the posts were in). Now we were able to play musical horses with our original three and an additional two ponies. We're up to five. We added **hot tape on top and bottom to avoid damage to the fence and gates because some behemoth horses know they are tall enough to reach the other side and strong enough not to care what's in their way.** Originally we used white hot tape from the feed store but have since changed it out with the brown tape

from RAMM which is more heavy duty for about the same price.

Our journey went west... Now it was time to tackle the west side of the barn. In 2006 we decided to start a **horse boarding and training facility** so we had to finish up the other stalls in the barn to make room for boarders.

The journey continues to this day as we have so many projects still to complete and many more fences to run. Our little Thunder Ranch and Training Center has come a long way from right before we moved in... until today.

Before - 2004

Currently - 2012

ELECTRIC FENCE Q & A

HOW DOES ELECTRIC FENCE WORK?

This fence works by having an energy source that releases a pulse onto an insulated fence line about once every second. When an animal makes contact with the fence, the circuit is completed, and the animal receives a "shock." The current flows from the charger, down the fence line, to the animal, then finally to the ground.

WHEN IS ELECTRIC FENCING NEEDED?

Does your horse lean, chew, crib, charge your fence or is overly active? Are your fences difficult to see? You will need electric fencing.

NUMBER OF STRANDS?

The number of strands of Electric Fence is a matter of your particular application. 65% of Electric Fence users install 3 strands. 4 strands are most commonly used when fencing along busy roads, around crowded areas, smaller paddocks, aggressive animals or foals. Always consider the rail or strand spacing most appropriate for your particular needs.

POSTS AND POST SPACING?

The type of post used is entirely

your choice. At RAMM we carry insulators for wood posts, PVC Sleeves, steel T-posts and Round Rods up to 5/8" in diameter. When using electric fencing for horses we recommend that your posts are spaced no further than 12-15 ft. All corner and end posts should be braced and concreted.

WHAT SIZE CHARGER DO I NEED?

A basic rule to follow is: 1 Joule = 6 miles of fence. That is only true in a perfect situation where you have perfect climate, no excess vegetation growth and no corrosion of wires. In most situations you should figure 1 joule for every 1-2 miles of fence.

WHAT ARE JOULES?

A joule is a measurement of electrical energy. 1 Joule is equal to 1 watt of power for 1 second of time (watt x time = joules)

WHAT IS THE DIFFERENCE BETWEEN LOW AND HIGH IMPEDANCE?

Low impedance fence chargers have the capability of increasing their energy output as the fence load increases. This means that if weeds touch the fence and draw voltage and

amperage to earth, a low impedance charger will begin to produce higher amounts of energy or joules. These higher energy levels will overcome the voltage and current loss caused by weeds and maintain energy levels on the fence for controlling animals. High impedance fence chargers do not have the capability of increasing their output energy as fence loads increase, and cannot overcome high levels of fence load. They "short out" when too many weeds touch the fence.

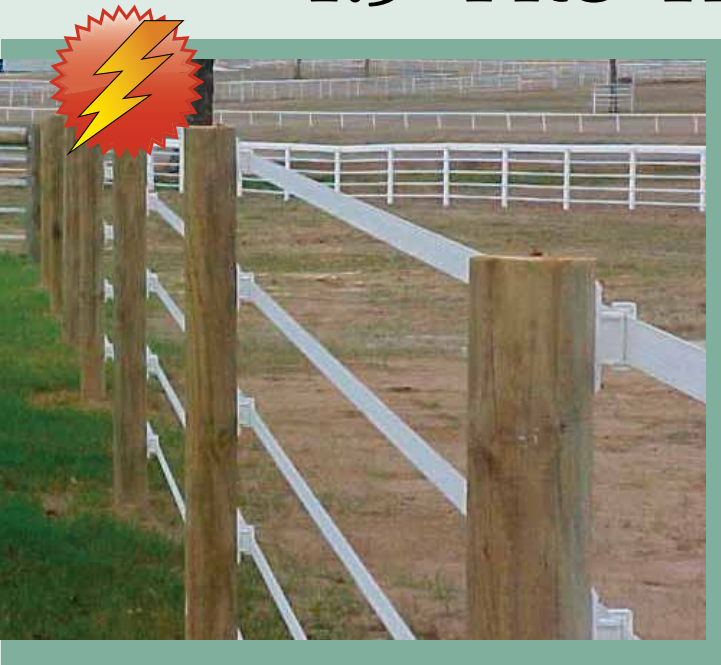

HOW MUCH SHOCK DO I NEED?

Experience has taught us that short-haired animals require a minimum of 2000 volts to control them: long-haired animals require approximately 3-4000 volts.

WHAT IS THE PRIMARY FUNCTION OF THE GROUNDING SYSTEM?

The grounding system is required to ensure maximum performance and stopping power. Remember that your shock is only as good as your grounding system and your ground rods complete your circuit. We recommend at least three ground rods, 5' long and spaced 10' apart.

1.5" PRO-TEK ELECTRIC TAPE

- 750 lbs. of break strength per rail
- Highly visible and available in white, black and brown
- Your horse will be safer - 15 stainless steel wires help keep your fence working properly, longer
- Affordable price, exceptional quality
- Can be used with wood or t-posts
- Easier installation - tensions by hand
- Stands up to the worst weather conditions - contains a UV guard
- Longer lasting, less maintenance - stainless steel conductive won't corrode
- **This is not your farm store fencing!**
- **For as low as \$0.13 per foot per rail**

WHITE, BLACK, BROWN	ITEM #	LIST PRICE	1-6 Rolls	7+ Rolls

ELECTROBRAID™ FENCE

- The safe, secure, permanent electric fence
- ElectroBraid™ is lightweight and easier to handle allowing anyone to install it
- A double helix of copper wire conductors is braided into the outer jacket of the rope
- Outer braided jacket is made of very high grade polyester fiber - used in auto seat belts and parachute harnesses
- Resists attack by ultra-violet light, salt, manure and most farm chemicals
- Designed to minimize injuries and secure horses in a safer alternative

PROTECT YOUR INVESTMENT

LIGHTNING PROTECTION IS ESSENTIAL TO PROTECTING YOUR INVESTMENT IN FENCE CHARGERS.

A good grounding system must be installed. A few feet of rod in the ground is not enough except for light portable chargers. If there are a lot of shorts on the fence and/or the ground is very dry, it is not uncommon to need more than 3 - 5' ground rods.

Ground rods should be ten feet apart and at least thirty feet from other existing grounds. Stay

away from water pipes (especially those going to drinking areas) or buildings where the electric charge may affect livestock (like milking areas) or people. The non-electrified wires on a fence can be connected to bring distant ground rods back to the ground terminal of the charger. Some installations have required over 10 - 8' ground rods.

ELECTRIC FENCE ACCESSORIES

ELECTROBRAID™, ELECTRIC ROPE, HOTCOTE® & TWINE

 <p>RING INSULATOR Screws directly into wood post. For use with ring adapter. Item #IR(I,W)-0.5 Price: 59¢ ea. Blk. & Wht.</p>	 <p>T-POST CLAW INSULATOR Quickly clips to T-post. Stainless steel screws. For attaching
insulators and tensioners to post.
1.5" Item #W16-1
Price: \$5.49 / 50 pk.
3/4" Item #116-1
Price: \$4.98 / 50 pk.
1/2" Item #S16-1
Price: \$3.98 / 50 pk.

ELECTRIC GATE HANDLE
Can be adjusted up to 20' with convenient
bungee cord. Needs additional R50 or ring
insulator to connect.
Item #ERG-2
Price: \$24.98

LED ELECTRIC FENCE TESTER

Five lights tell you the amount of voltage on
your fence line.
Item #R27-1
Price: \$14.98

HIGH VOLT BURIAL WIRE

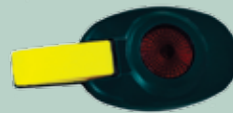

10,000 volt under gate fence wire won't leak
voltage into ground. Bury 12" in conduit.
Recommended to run no farther than 50'
Item #R208-12 Price: \$49.98/200 ft.
Item #R108-12 Price: \$24.98/100 ft.
Item #R58-12 Price: \$12.98/50 ft.
S-BOLT Used to connect burial wire to fence
line.
Item #SBOLT **Price: \$2.78**

DOUBLE CUTOUT SWITCH
Used to disconnect power to one or more
areas of fencing..
Item #DTCSB-2
Price: \$12.98

SINGLE CUTOUT SWITCH
Use to disconnect power to a certain area of
your fence.
Item #STCSB-2
Price: \$11.98

FENCE ALERT

Light will flash when voltage is low or erratic.
2 buttons. 2000 volt or below, second button
- 2500 volt or below.
Item #EFTSL-1
Price: \$19.98

GROUND ROD KIT

Includes 3 ground rods, 3 ground clamps, 50'
galvanized wire.
Item #GR3-16
Price: \$49.98
Single Ground Rod Kit with Clamp
Item #GR1-6 **Price: \$16.98**

LIGHTNING DIVERTER
Helps to protect fence chargers
from lightning strikes.
Item #LD-3
Price: \$12.98

LIGHTNING ARRESTOR
Made of plastic & is totally enclosed.
Can be mounted on hot fence with
split bolt or mounted to post.
Item #MWLA-3
Price: \$14.98

DIGITAL ELECTRIC FENCE COMPASS
Cordless voltage and current reading.
Item #DEFT-1
Price: \$119.00

REWIND REEL
Winds tape onto reel for easy
installation.
Item #RMINI-5
Price: \$34.29

ELECTRIC FENCE WARNING SIGN
Warns others of the presence of
electric fence.
Item #EFS-1
Price: \$5.99 / 3pk.

RAMM Stalls & Horse Fencing

ELECTRIC FENCE CHARGERS

EQUINE SERIES

This group is rated for cattle, horses, sheep, poultry, dogs and rabbits.

CORRAL

- Polytape -- 1-4 acres
- Coated Wire -- 8-12 miles
- Open Line Output - 6,100 V
- Output @500 Ohm - 3,300 V
- Stored Joules - 0.43

Item #HP40-2

Price: \$106.67 ea.

ACREAGE

- Polytape -- 6-10 acres
- Coated Wire -- 25-35 miles
- Open Line Output - 7,300 V
- Output @500 Ohm - 4,000 V
- Stored Joules - 1.20

Item #HP120-2

Price: \$127.62 ea.

PROFESSIONAL SERIES

This group is rated for cattle, horses, and sheep.

HERD BOSS

- Polytape -- 20-30 acres
- Coated Wire -- 50-70 miles
- Open Line Output - 8,300 V
- Output @500 Ohm - 5,000 V
- Stored Joules - 3.64

Item #HP300-7

Price: \$224.76

RANCHER

- Polytape -- 45-55 acres
- Coated Wire -- 120-130 miles
- Open Line Output - 9,500 V
- Output @500 Ohm - 6,200 V
- Stored Joules - 6.53

Item #HP600-7

Price: \$259.05

CATTLEMAN

- Polytape -- 70-90 acres
- Coated Wire -- 230-250 miles
- Open Line Output - 9,500 V
- Output @500 Ohm - 6,100 V
- Stored Joules - 12.53

Item #HP1200-10

Price: \$289.52

BATTERY OPERATION SERIES

This group is rated for horses, and sheep. Battery not included.

TRAIL

- Power Source - 2 D-cell, alkaline batteries
- Power Duration - approx. 8 weeks
- Polytape -- max 0.5 acres
- Coated Wire -- max 1 mile
- Open Line Output - 10,000 V
- Output @500 Ohm - 670 V
- Stored Joules - 0.024

Item #HPB2D-2

Price: \$100.95

NOMAD

- Power Source - 12 V DC external battery
- Power Duration - approx. 4 weeks
- Polytape -- 4-8 acres
- Coated Wire -- 20-30 miles
- Open Line Output - 8,500 V
- Output @500 Ohm - 3,800 V
- Stored Joules - 0.16

Item #HPB112-4

Price: \$213.33

PEGASUS

- Power Source - 4 internal D-cell, alkaline batteries or 12V DC external battery
- Power Duration - approx. 8-12 weeks
- Polytape -- 0.5-2 acres
- Coated Wire -- 2-5 miles
- Open Line Output - 6,400 V
- Output @500 Ohm - 750 V
- Stored Joules - 0.04

Item #HPB124-4

Price: \$188.57

PLAINSMAN

- Power Source - 12V DC external battery
- Power Duration - approx. 4 weeks
- Polytape -- 15-12 acres
- Coated Wire -- 45-55 miles
- Open Line Output - 9,600 V
- Output @500 Ohm - 4,950 V
- Stored Joules - 2.44

Item #HPB212-4

Price: \$236.19

SOLAR ADAPTOR

The HP-SK12V Solar Power Kit converts the Nomad and Plainsman into solar fence chargers. The powerful 11 watt solar panel is big enough to keep up with the high output of the Plainsman, insuring that the 12 volt battery is always charged even on rainy or cloudy days. It is fixed with an output regulator that prevents the battery from becoming over charged and back flow circuitry to prevent the battery power from draining back into the panel at night. The kit includes a post mounting bracket that holds the panel at a 45 degree angle on a wood or t-post.

Item #HPSK12V

Price: \$320.00

RAMM TIP

To determine what charger to use for 4 strands of electric fence - length x width = square footage. Square ft. divided by 43,560 = the # of acres. Acre listing is given for each charger.

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

POST LIMITED WARRANTY: This product is warranted by the manufacturer against manufacturer's defects for the post only. Any additional charges incurred due to a warranty claim, including but not limited to, paint, concrete and labor for removal and installation are not covered. Please read the manufacturer's limited warranty for complete details.

ITEM	DIAMETER	LENGTH	ITEM #	OUR PRICE
Pressure Treated Posts	4", 5", 6"	8' or 9'	48P, 58P, 69P	CALL

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

PAINT

- WILL NOT FADE OR PEEL
- PAINTS APPROXIMATELY 50 POSTS PER BUCKET - LEAD FREE!
- RESISTS MILDEW AND CORROSION; LATEX - EASY WATER CLEANUP
- CAN BE SPRAYED OR BRUSHED ON POSTS OR BARNES
- PRODUCES A FLEXIBLE COATING IDEAL FOR BOARD FENCE

This paint is made especially for RAMM to ensure long life and high quality! Due to the nature of Fir wood, we do not recommend using RAMM paint. We suggest staining Fir, rather than painting it. Allow posts to dry 1-2 months if posts are wet. If painting black, allow 3 months if posts are wet.

Freight F.O.B. Swanton, OH. Installation must comply with manufacturer's specifications. Prices subject to change without notice. Call for quantity pricing.

PRO-TEK ROUND PENS

A round pen is a great investment, no matter how many horses you have. This useful tool provides an isolated environment for one-on-one work. It's often a safer way to work with young horses, excitable horses, or horses that are rehabilitating from an injury. When not in use, your round pen can be made into a temporary stall!

These round pen panels are designed for use in the round pen system, and are not intended to be used as fencing or gates. They should not be used with horses for other purposes.

PRO-TEK ROUND PEN

LIGHT DUTY

- Welded construction from 19 gauge 1-11/16" diameter steel tubing
- Pre-Galvanized for outdoor weathering
- Center Support for bar strength
- Panels are 6' tall
- Gate panel is 8'8" t x 6' w
- Actual gate is 4.5' t x 5.5' w
- Gate swings in both directions
- Squared Welded Legs (17.25" 90° corner)

DESCRIPTION	ITEM #	OUR PRICE

ESTIMATE CENTER

Fax or e-mail your layout for a FREE estimate!

In order to provide you with an accurate estimate, please sketch your layout and answer the following questions. Be as accurate as you can. Any additional information you have will help us help you! If you are unsure of the best way to lay out your barn and stalls, give us a call and we can give you time proven ideas!

Give us as much detail as possible, including dimensions of stalls, aisleways, windows that need grills, etc.

• **Which stall systems are you interested in?**

Remember, if you don't have support posts in your barn, you will either need to add them or use the Finish-Line, Portable/ Panel or Racetrack system.

• **What do you need to accomplish with your stalls?**

Foaling, stalling stallions, sale barn, boarding, etc.?

• **Where will your tack storage and wash rack be located?**

Depending on your layout, we may be able to save you money by strategically positioning your stalls.

• **What dimensions will your stalls be?**

Take into account the size of your horse, and remember that the bigger your stall, the better it is for your horse.

• **Will you need solid partitions or solid back walls?**

These are the most over looked areas that take a lot of abuse. Grilled partitions increase ventilation and encourage socialization. Think about which horses will be stalled next to each other and whether they get along.

• **What is your climate like?**

Could your barn be open all year long, or would harsh winters and heavy winds make it necessary to shut it up tight?

• **Do you need to plan for feed openings or feed doors large enough to hold a hay and grain feeder?**

Do you want wall feeders, corner grain feeders? Bucket doors?

• **Do you want right or left hand doors?**

Some stall fronts are available with doors that open to the right or the left. After seeing your layout, we can make a recommendation on which way your doors should open.

• **Do you have any special considerations or concerns with your barn?**

Tell us all you can so we can help you get the best stall system for your horses.

RAMM Stalls & Horse Fencing

PRO-LINE STALLS

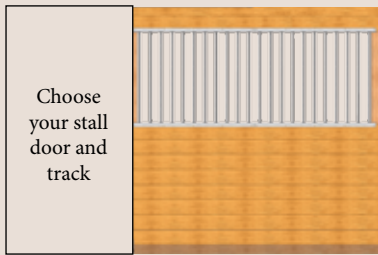

The Pro-Line horse stall systems offer superior quality at an economical price. This horse stall system makes it easy for those on a budget to find everything they need to build attractive, functional stalls for their horses. These stall fronts attach to the front of your support posts. The latch on this stall is a quick and easy slide latch system. Square track rollers provide an even and quiet stall door opening and closing. Non-corrosive galvanized steel will ensure that your horse stalls stay looking beautiful for years to come.

RAMM Stalls & Horse Fencing

STANDARD STALLS

Our heavy-duty grommets are larger than others, covering the entire opening and overlapping to help eliminate rattling with your bars. The Standard Stall system allows you to replace single bars, instead of the entire grill! We pay attention to the smallest details, so you get high quality products. Standard Stalls feature 2 3/8" spacing between bars (3 1/4" on the center).

WATERERS & BUCKETS

FLEXIBLE STALL WATERER

An innovative, flexible waterer. Made in Germany utilizing brass valves. Will not stick open like water float valve systems.

Item #FHW-4

Price: \$69.00

LOCKABLE STALL WATERER

Plastic with brass valves. Allows you to shut off the flow of water right at the paddle. Horses must push on paddle for water.

This design wastes less water and the bowl stays cleaner.

Item #LHR-4

Price: \$74.00

SWING OUT BUCKET DOOR

Allows you to water from the aisleway instead of going into the stall. This heavy-duty door is big enough to hold a 5-gallon bucket with a standard bucket holder, or our insulated 5-gallon bucket and holder (not included). Slide-bolt latch keeps door closed tight. Galvanized steel. Measures 18.5" x 22".

Item #SBHD(B,G)-26

**Price: \$99.00 Galvanized
\$159.00 Painted**

INSULATED BUCKET HOLDER

Keeps water from freezing in winter, and cooler in summer. Includes a 5-gallon poly pail with float. Can be added into a swing-out bucket door, or mounted directly on the stall wall.

Measures 16" x 18" x 16"

Item #PHSW-11

Price: \$91.20

AUTO STALL WATERER

- Mount on stall wall
- Removable drain plug for easy cleaning
- Made of heavy-duty polyethylene
- Wall filled with extra urethane insulation
- Rounded edges for safety
- Adjustable height drinker
- Heater turns on at 42 degrees/off at 52 degrees
- Measures 12" x 14" x 41"

Item #ASWH-11

Price: \$216.50

PAIL SAFE BUCKET HOLDER

Virtually horse proof, and people friendly. For use with any flat-back bucket.

Black only. Bucket sold separate.

Item #PSB-1

Price: \$24.00

5-GALLON BUCKET HOLDER

Fasten using lag bolts, or for more strength, bolt right through stall wall (fasteners not included). Available in red, or custom match your welded, painted stall system. Bucket not included.

Item #BH5-5

Price: \$19.98

5-GALLON FLAT-BACK HEATED BUCKET

One of our best selling buckets. Keeps water from freezing in the winter. Caution: If unit is unplugged, water will freeze. Remove ice before plugging unit in again. Six-foot shielded cord protects horses from chewing. One-year limited warranty.

Item #EBB-6

Price: \$39.98

16-GALLON HEATED BUCKET

Thermostatically controlled to keep water approximately 42 degrees. The 260 watt heater is energy efficient, and the 6' shielded cord protects horses from chewing. Caution: Put in a sheltered area and stabilize bucket for use on very cold days. Blue only. One-year limited warranty.

Item #16EB-9

Price: \$69.98

INSULATED WATERER WITH OPTIONAL HEATER

- Insulated unit utilizes a 100-watt infrared heater
- Auto fill valve
- Wall filled with urethane insulation
- Made of high-density polyethylene
- Removable drain plug for easy cleaning
- Made from a single, solid polymer shape, so there's no chance of electric shock through the water
- Heater turns on at 42 degrees/off at 52 degrees
- Measures 22" x 10" x 48"
- 5 Gallon tank, up to 6 horses

Item #WPHI-37

Price: \$380.00

All prices subject to change without notice. Call for quantity pricing.

RAMM Stalls & Horse Fencing

FEEDERS & HAY RACKS

WALL MOUNT HAY RACK

Can be mounted on a partition or back wall of your stall. Measures 32" wide, 7" deep and 32" high. Powder-coated black or galvanized. Item #HRW(galv) or HRWB(black)
Price: \$42.00

CORNER HAY RACK

Corner feeder holds 2 or 3 flakes of hay and allows dust to fall. Powder-coated black or hot-dipped galvanized. Measures 32" wide, 7" deep and 28" high. Item #HRC-11
Price: \$42.00

POLY CORNER GRAIN FEEDER

Helps prevent horse from throwing, pushing or spilling feed. Smooth, rounded edges prevent injury. The entire feeder measures 16" high by 24" wide. Feed opening is 9.75" deep and 12" across. Item #PHGF-3
Price: \$22.15

POLY CORNER FEEDER

Made of PolyTuff material, this feeder/hay rack will stand up to the toughest demands. Can be bolted into a corner or put onto a corner swing out door. Measures 21" x 35". Item #PCF-28
Price: \$169.50
*Note: This only fits the large feed door.

GALVANIZED CORNER MOUNT FEEDER

Strong corner mount unit ships in a kit for easy assembly. Measure 25" wide, 17" deep and 6" high. Item #CFP-16
Price: \$69.00

GALVANIZED WALL MOUNT FEEDER

Easy to assemble and very strong with bottom brace. Ships compact and includes all hardware. Safety edges on all metal components. Measures: 20" wide, 13" deep and 6" high. Item #WFP-17
Price: \$69.00

GALVANIZED CORNER HAY RACK

Combination hay and grain feeder. Measures 36" wide, 22" deep and 32" high. Item #CFHR-66
Price: \$199.00

GALVANIZED WALL HAY RACK

Mounts on any flat surface either on a partition or back wall of your barn. Measures 24" wide, 18" deep and 32" high. Item #WFHR-61
Price: \$188.00

TACK ACCESSORIES

BLANKET BARS

Holds blankets, sheets, halters, etc. Steel bar measures 40.5" long. Item #BB-5
Price: \$28.88

FOLDING SADDLE RACK

This sturdy folding saddle rack with welded construction mounts easily to any flat surface and comes with built-in bridle hook. Stores your saddle in the correct position and conveniently folds down when not in use. Item #SADRACK-6
Price: \$59.00

Rat Zapper

- Larger chamber than the Rat Zapper Classic
- Bait with ordinary pet food.
- Mice and rats enter the chamber and are dispatched with a quick but powerful jolt of electricity.
- Humanely gets rid of mice, rats and other rodents. If they'll fit in the chamber, Rat Zapper will dispatch them!
- No blood, no gore, no mess, and no poisons to endanger your pets or the environment
- Flashing kill light tells you when you have a catch; simply tip the Rat Zapper and let the dead rodent slide into the trash can. Item #RZU-2

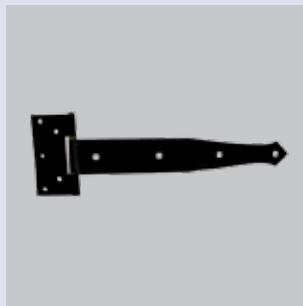

Price: \$59.99

All prices subject to change without notice. Call for quantity pricing.

ARENA FOOTING TREATMENT

RAMM Arena Conditioner - An Innovative Solution to Create a Cleaner Environment for Horse and Rider. RAMM Arena Conditioner is an odorless, non-toxic and non-hazardous cross-linked, acrylamide co-polymer.

RAMM Arena Conditioner acts like a "super-sponge", absorbing and storing nearly two hundred times its dry weight in water, releasing the moisture into the arena surface as needed. A moist surface will control dust and give the arena a more consistent and softer texture and create a cleaner, less dusty environment for both horse and rider.

RAMM Arena Conditioner is worked into the arena surface and then watered. The water absorption capacity of RAMM Arena Conditioner allows watering requirements to be reduced, and in some cases cut in half.

Absorbs & Holds H2O

ARENA & STALL LIGHTING

Full spectrum lighting gives your barn a bright day light view! Tightly sealed lights keep dirt and bugs out of fixtures keeping them clean and bright. (Lights include the bulbs). If you are looking for the ultimate lighting for your stalls, barn or arena, RAMM Full Spectrum lighting is for you and your horses!

- Full-spectrum lighting with no glare or no shadows
- 800 watts of light with only 84 watts consumed
- Fiberglass housing designed for wet locations, no rusting parts
- Gasketed to seal out moisture, dust and bugs
- 3 high performance, T8 - 5,000 Kelvin temperature 30,000 hour lamps
- Bulbs last up to 40 times longer than standard incandescent bulbs, saving money

Item #4AG

Price: \$119.00

- 200 watts of light with only 36 watts consumed
- Virtually indestructible flame and rust proof polycarbonate housing
- Instant on at -20°F
- 5,000 Kelvin temperature lamp
- Lamps last up to 13 times longer than a standard incandescent bulb
- Clear diffuser for maximum light output
- Power wash without fear of breakage or water penetration

Item #OAG36HW

Price: \$69.00

A SATISFIED CUSTOMER:

"When we built our barn, I told my husband that I wanted to have stalls and a barn that I could see my horses in, day or night. We installed the RAMM arena and stall lights and I could not believe how much light they produced! It was like day light, even on the darkest nights. I can see my horses, tack and feed clearly with out any strain or white light glare. We decided to install them in our arena and have had several clinics. Every clinician raved about the lighting and told us it was one of the nicest facilities they ever worked in! Thank you RAMM!"

- Kristen F. Bryan, OH

RUN-IN SHEDS

Run-In Sheds combine versatility, longevity, safety and low maintenance into one simple package.

The design and use of shelter facilities should promote the health, well-being and good performance of horses throughout all stages of their lives. Natural or constructed shelter areas must offer adequate protection from adverse weather conditions.

Whether horses are out 24/7 or on daily turnout, shelter is important to protect your horses from the elements. Studies have shown that 100 square feet per horse is the optimal size for a run in shed. Most people decide a 10' x 20' three sided shed is good for 1-10 horses as most of the time only a couple of horses use the sheds at any one time.

Shelter areas should be located to avoid adverse effects of predictable natural occurrences, such as flooding, but if this should occur, our Run-In Sheds are ideal as they can be moved very easily.

Pastures, paddocks and feed lots used during cold seasons must have adequate windbreaks to reduce the effects of wind chill.

RUN-IN SHEDS

- Portable Shed or Permanent Shelter
- Will not rot or be chewed
- Pre-engineered square tubular frame
- Hot-dipped galvanized finish
- Can be easily converted into stalls or divided by installing a partition
- Assembly required
- Wood is not included, but can be purchased separately through RAMM
- Consider installing feeders and waterers into your run-in shed or shelter to ensure your horse has constant access to fresh food and water

DUTCH & BALE DOORS

This 400 year old door style is popular yet today, among barn owners, due to the charm it lends. For practical reasons, the bottom door keeps the animals in or out of the barn as desired. The top door allows for improved ventilation and socialization. Barn doors made of wood often warp due to temperature changes. But RAMM'S steel frame door system resists warping and twisting allowing your door to open and close properly for many years. Add beauty and functionality to your barn! Custom sizes and designs available.

BALE DOOR

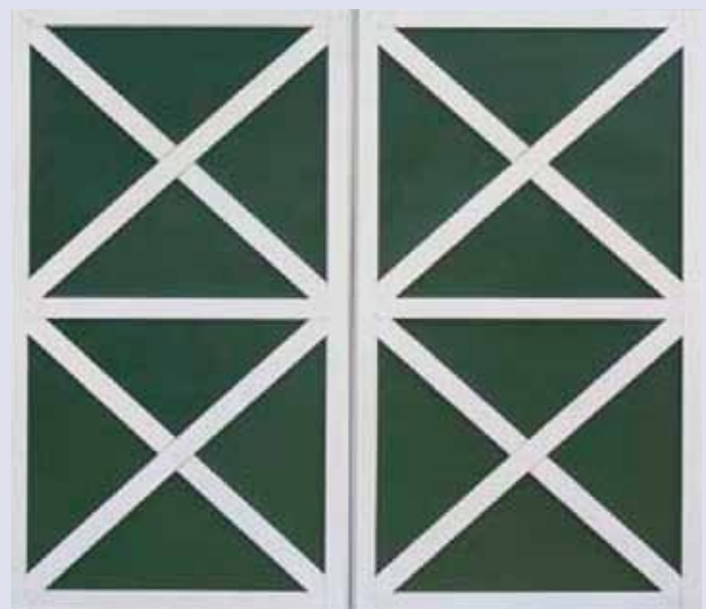

BALE WINDOW

SINGLE DUTCH DOOR

DOUBLE DUTCH DOOR

- All doors are built to order
- One piece laser cut design or optional kit form
- Standard D-latch
- 3 piece frame prepped with hinges or optional welded frame
- Window optional on top panel door
- Over 30 colors to choose from
- Aids in ventilation
- Comes in either galvanized or powder-coat painted
- Wood is not included

All prices subject to change without notice. Call for quantity pricing.

CUSTOMER TESTIMONIALS

Ashley P., Wisconsin

"Our experience with RAMM Fence was outstanding! I am a first time horse owner, and I had a lot of questions as to what type of fence would be best for our horses. They were there to answer and help with every question I had. We

chose the 5" High Impact Performance Plus Flex Fence. Every penny was beyond worth it. It looks fabulous, holds up great, and is extremely safe for our horses. We get so many comments on our fence by people we don't even know. They always say your fence is your best investment in your equine set-up and I can honestly say the High Impact is the way to go. We are beyond satisfied! Thank you Ramm Fence!"

Jeff & Shannon S., Illinois

"We recently had the opportunity to fence in our 9 acre property with RAMM's High Impact flex fence. From start to finish, RAMM Fence is a phenomenal company to work with. Christy, who was our salesperson at RAMM did a great job working with us. She would

very kindly price, and re-price the fence we wanted as we continued to redesign it. Christy was so patient and kind, through the whole process. We loved the fact that flex fence would be something we would only have to install on our property once in our life, it was a great feeling! The materials are of impeccable quality and came very quickly. Everything was very well labeled, and the instruction manual had great detail. The fence went up so smoothly. The most impressive part was that it looks just like oak fencing, with the best part being that we never have to paint it! Our whole family helped put up the fence and even our older daughter at 14 years old says that it was a lot of fun."

Taryn F., New Jersey

"I own a 40-acre farm in southern NJ. We had wood fencing and have been slowly replacing the wood with mesh fencing. We have been saying that we need to complete the fencing along our road, but have always put it off to the next year. So we have been

replacing wood boards where the horses rub for over 8 years. I saw the e-mail from RAMM that they were having a fall sale and they had the ElectroBraid™ that I love, but just never thought I could afford. I finally took the leap and boy was it a good leap. We did 4 runs of over 1500 ft and it looks fabulous. I have no idea why we waited so long. This fencing was so easy to install. It makes my fence line look sharp and so attractive. My old wood fencing was so uneven it was embarrassing. Thank you so much Veronica for putting up with all my questions, e-mails, and phone calls. This was so worth the money and I look forward to working with RAMM in the future."

Wade T., Illinois

"We put up the 5" High Impact Performance Flex Fence and were very happy with the ease of installation. The fence looks great, we've had a lot of positive feedback from our neighbors and the community. We also put up Standard Stalls and got great reviews on how professional it looks."

Scott, Michigan

"After over 5 years of use in Michigan, our Flex-Fence still looks as good as new. It was easy to install, durable, and keeps our horses safe. Looking back at the many other fencing solutions, this was a worthwhile investment. Thanks RAMM Fence!"
